VALORtech.AI is a mission-driven, Service-Disabled Veteran-Owned Small Business (SDVOSB) headquartered in Washington, D.C. We deliver AI-powered, cloud-native, and data-centric solutions tailored to federal, defense, and public health missions. Our veteran-led team fuses operational realism with technical depth to create secure, interoperable, and scalable platforms aligned with mission readiness and strategic transformation. VALORtech.AI is eligible for VETS 2, CIO-SP4, GSA MAS, and other federal vehicles, and is actively supporting high-impact initiatives across federal health and defense environments.

Core Competencies

- Information Technology Professional Services - We deliver hands-on enterprise IT modernization built for scale and operational pressure.
- Health Information Technology Services - We modernize and strengthen clinical and operational health ecosystems throughout Health IT inside DoD and VA systems
- Cloud and Cloud-related IT Professional Services - We design and sustain secure cloud ecosystems that serve as the operational backbone of federal and defense programs
- One Unified Capability Stack - These services are not separate offerings sitting on a shelf. They form a connected modernization stack:
 - Secure Cloud Infrastructure
 - Enterprise IT Transformation and AI Enablement
 - Specialized Health IT Modernization

Differentiators

- Veteran-Aligned Leadership for Operational Resilience (VALOR): A peer-led team of technologists, strategists, and engineers with real-world mission experience.
- Proven past performance through legacy engagements at CDC, HHS, VA, State Public Health, DoD/DoW
- Agile and low-overhead delivery model aligned to the speed of mission.
- Deep integration expertise across Oracle Cloud Infrastructure, AWS, AZURE, and hybrid environments.
- Sentinel Six – A VALORtech.AI Foundation: A nonprofit arm supporting veterans, first responders, and their families through scholarships, job training, and mental health support.

Company Data

- VALORtech.AI – Incorporated in the State of Nevada in 2023
- NAICS Codes:
 - **518210** – Data Processing, Hosting, and Related Services, **541511** – Custom Computer Programming Services, **541512** – Computer Systems Design Services, **541513** – Computer Facilities Management Services, **541519** – Other Computer Related Services, **541611** – Administrative Management & General Consulting, **541715** – R&D in Physical, Engineering, and Life Sciences, **541690** – Scientific & Technical Consulting

Representative Past Performance

- DoD/DoW – Logistics analytics modernization
- Centers for Disease Control and Prevention (CDC) – Public health data modernization
- State Health Departments and Agencies – Cloud migration and data engineering and surveillance and Medicaid analytics

Contract Vehicles & Certifications
